

Volume and tone control - preamplifier

K8084

When using one of our amplifiers (big or small), you always need a volume control and preferably also a tone control.

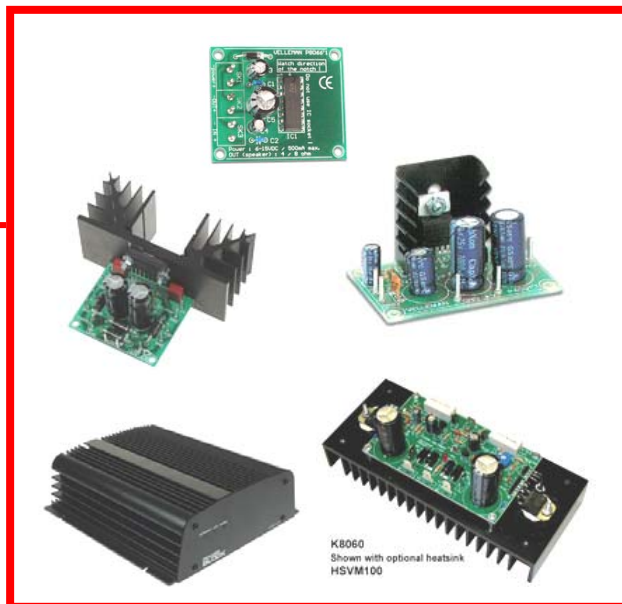

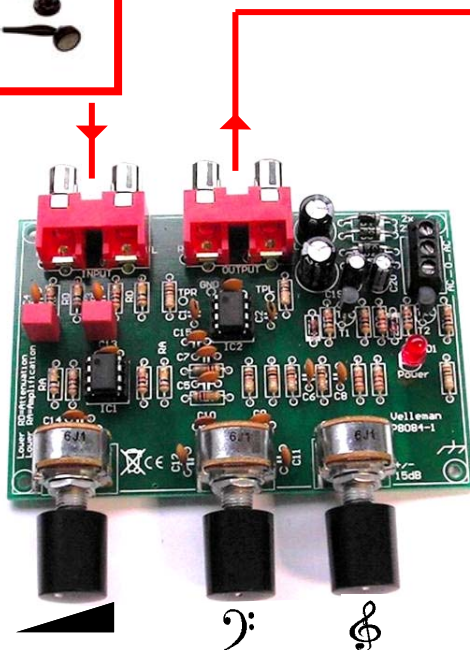

This kit comes complete with all input output connections and potentiometers. Furthermore it is possible to amplify or attenuate the input signal.

Features

- Stereo volume control
- Stereo Baxandal bass and treble control
- Bass and treble potentiometers with centre click
- Customisable attenuation or amplification
- Complete with knobs

K8081, K8060, ...

Specifications

- Supply voltage: 2x 12Vac / 100mA
- Frequency response: 3Hz - 500KHz (-3dB)
- Standard amplification: x1
- Signal to noise ratio: 98dB
- Harmonic distortion: < 0.005% (@1KHz)
- Maximum output: 5Vrms
- Tone control:
 - + and -15dB @ 20Hz
 - + and -15dB @ 15KHz
- Input impedance: 50Kohm
- Pcb dimensions: 105 x 70mm / 4,1 x 2,75"
